

## GRANT #15

# BRING THE GOSPEL TO MUSLIM SEEKERS IN CALIFORNIA – MAKING TECHNOLOGY PERSONAL

\$8,900

POBLO International

Many world events today have resulted in Muslim people being displaced from their homelands as refugees and more open to Christian faith than at any time in their lives. Because of the atrocities committed against them in the name of religion, these new refugees are searching for a God of love. Fortunately, technology is a perfect way to reach this open minded group. Using websites, blogs and chat rooms, seekers throughout California, and nationwide, will begin to learn about Christ. Through the POBLO International mission project, a seeker website will be the starting point. Seekers will post their questions and receive immediate feedback. Trained workers who know Islam inside and out will answer questions while pointing them to salvation through Christ. These relationships will result in online Bible studies where seekers can be taught in detail the truths about God and Christ. In person contact will be the final step allowing Muslim seekers to be discipled as followers of Christ. Requested grant funds will be used to implement this mission.
